

Door - Free Holding

Hassle-Free Heated Holding!

Flexible food holding for tight spaces.

Hold covered moisture-sensitive food, uncovered crisp foods... even boxed pizza!

We've upsized our modular holding technology for free-standing cabinets with larger capacity. They're ideal for holding moisture-sensitive food in pans, boxed pizza, and even uncovered crispy food. The doorless design enables them to fit into a smaller space than a traditional holding cabinet. Pass-through design allows convenient access from both sides.

- Unique design allows for a variety of holding environments in a single cabinet
- Individually heated shelves with removable lids
- Door-free design for easy access and improved traffic flow in the kitchen
- Digital controls for precise temperature settings
- Models with universal shelves for 18"x26" or 12"x20"x2.5" pans; models for 12"x20"x2.5" pans; models for boxed pizza up to 18"x18". Four shelf and 5 shelf models
- Stackable, without the use or expense of a stacking kit

For Pizza Boxes

DF1818-5

For Sheet & Steam Table Pans

DF2620-5

For Steam Table Pans

DF1220-5
